DETAILED ACTION

Information Disclosure Statement

1. The listing of references in the specification is not a proper information disclosure statement. 37 CFR 1.98(b) requires a list of all patents, publications, or other information submitted for consideration by the Office, and MPEP § 609 A(1) states, "the list may not be incorporated into the specification but must be submitted in a separate paper." Therefore, unless the references have been cited by the examiner on form PTO-892, they have not been considered.

Claim Rejections - 35 USC § 112

2. The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

3. Claims 7 and 8 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

The limitation of "mounting angle of said geometrically shaped object to said garden hose" recited in both claim 7 and claim 8 lacks antecedent basis in the claims.

Double Patenting

4. The nonstatutory double patenting rejection is based on a judicially created doctrine grounded in public policy (a policy reflected in the statute) so as to prevent the unjustified or improper timewise extension of the "right to exclude" granted by a patent and to prevent possible harassment by multiple assignees. See *In re Goodman*, 11 F.3d 1046, 29 USPQ2d 2010 (Fed. Cir. 1993); *In re Longi*, 759 F.2d 887, 225 USPQ 645 (Fed. Cir. 1985); *In re Van Ornum*, 686 F.2d 937, 214 USPQ 761 (CCPA 1982); *In re Vogel*, 422 F.2d 438, 164 USPQ 619 (CCPA 1970); and, *In re Thorington*, 418 F.2d 528, 163 USPQ 644 (CCPA 1969).

A timely filed terminal disclaimer in compliance with 37 CFR 1.321(c) may be used to overcome an actual or provisional rejection based on a nonstatutory double patenting ground

Art Unit: 3752

provided the conflicting application or patent is shown to be commonly owned with this application. See 37 CFR 1.130(b).

Effective January 1, 1994, a registered attorney or agent of record may sign a terminal disclaimer. A terminal disclaimer signed by the assignee must fully comply with 37 CFR 3.73(b).

5. Claims 1-19 are rejected under the judicially created doctrine of obviousness-type double patenting as being unpatentable over claims 1-21 of U.S. Patent No. 6,575,387 to Baker.

Although the conflicting claims are not identical, they are not patentably distinct from each other because the claims of Patent No. 6,575,387 include all of the claimed limitations of the instant application except for the limitation that the "predetermined length of the diameter of the geometrically shaped object extends in at least one plane a distance greater than a predetermined plane of pivot of said palm operable trigger lever". However it is deemed that the trigger guard will inherently have a diameter with a length that is greater than a predetermined plane of pivot of the trigger lever so that the guard does not interfere with the trigger lever during normal use of the device and if not inherent it would have been obvious to one of ordinary skill in the art at the time the invention was made to have made the guard with a diameter as such so as have a guard that does not interfere with the traveling path of the trigger during operation of the device.

Conclusion

6. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. Siczek, Jezek et al., Thurn, and Elliott-Moore all show trigger guards in the general state of the art of the invention.
